Answers

What is the first step in baking a cake?

Answer: Mix the dry and wet ingredients together.

How long do you bake cookies for?

Answer: It depends on the recipe, usually 10-15 minutes.

Why do you need to preheat the oven?

Answer: To ensure even cooking and prevent undercooking.

When should you add the salt to a recipe?

Answer: Salt should be added at the beginning of cooking.

Where do you store spices to keep them fresh?

Answer: In a cool, dark place away from direct sunlight.

Who invented the microwave oven?

Answer: Percy Spencer is credited with inventing the microwave oven.

Which ingredient gives bread its rise?

Answer: Yeast is responsible for the rise in bread dough.

Can you substitute baking powder with baking soda?

Answer: Yes, but you need to adjust the measurements.

Do you need to marinate meat before cooking?

Answer: Marinating meat can enhance the flavor and tenderness.

Are there any vegetables that should not be stored in the refrigerator?

Answer: Yes, certain vegetables like tomatoes and potatoes.
