Answer: _____

What is the ozone layer?

Answer: _____

Answers

What is a weather forecast?

Answer: A weather forecast predicts future weather conditions.

What are the typical weather conditions in your country?

Answer: The typical weather conditions in my country are hot and humid summers, and mild winters.

What is the difference between weather and climate?

Answer: Weather refers to the day-to-day atmospheric conditions, while climate refers to long-term patterns.

What are the four seasons?

Answer: The four seasons are spring, summer, autumn, and winter.

What is a heatwave?

Answer: A heatwave is a prolonged period of excessively hot weather.

What is a cold front?

Answer: A cold front is the leading edge of a cooler air mass, causing a drop in temperature.

What are the effects of a hurricane?

Answer: The effects of a hurricane include strong winds, heavy rainfall, and storm surge.

What is precipitation?

Answer: Precipitation refers to any form of water that falls from the atmosphere, such as rain, snow, or sleet.

What is fog?

Answer: Fog is a thick cloud of tiny water droplets suspended in the air, reducing visibility.

What is the ozone layer?

Answer: The ozone layer is a region of the Earth's stratosphere that contains a high concentration of ozone.
